Theoretical particle sensitivity — no dispersion-model output
A. Stokes settling with slip correction
B. Low-Reynolds-number applicability
0.9 g cm⁻³
1.05 g cm⁻³
1.4 g cm⁻³
1.05 g cm⁻³; χ = 2 schematic
Settling speed (mm s⁻¹)
Particle Reynolds number, ρair v d / μ
Re = 0.1 reference
Equivalent-sphere diameter (μm)
Equivalent-sphere diameter (μm)
χ = 2 divides the spherical speed by two; illustrative shape sensitivity, not an AERMOD fibre simulation.
