AERMOD steady-state plume near Clemson: 2 m s⁻¹, rain 1 mm h⁻¹

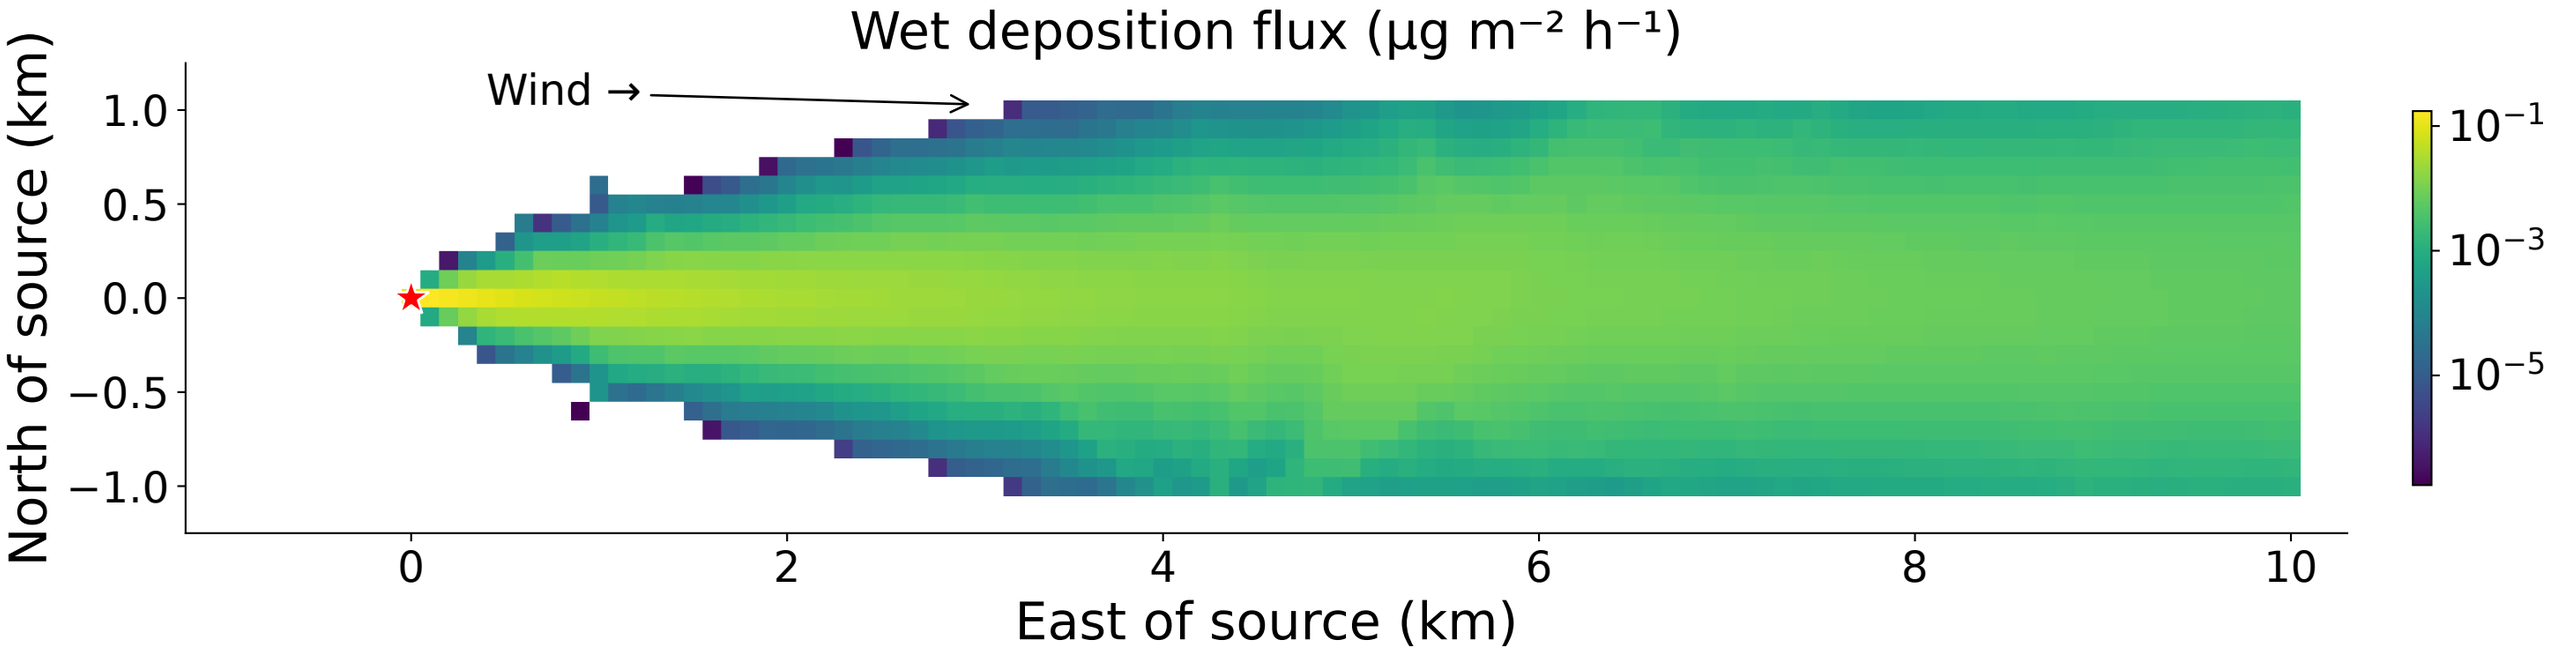

Concentration (µg m⁻³)

Dry deposition flux (µg m⁻² h⁻¹)

Wet deposition flux (µg m⁻² h⁻¹)

Each square shows a computed receptor; no spatial interpolation. Wind FROM west (270°); hypothetical source ★.
Colors show positive values, clipped at 10^{-6} of each field maximum. See the accompanying methods for assumptions.
