AERMOD concentration on the Clemson map
2 m s⁻¹ west wind · rain 1 mm h⁻¹ · fixed steady-state conditions

Hypothetical source: 10 g/day; 5 µm spherical particles. Source: 34.680° N, 82.840° W.
Semi-transparent native 100 m cells; contours use legend units. Overlay edges are display limits.
2024 is a regional-data reference; forcing is synthetic. No ambient microplastic background is added.

Basemap: USGS The National Map / US Topo (Clemson and Five Forks, 2024 editions).
